

2016/2017 Crop Forecast Survey Results Presentation

**Ministry of Agriculture
and
The Central Statistical Office**

10th May 2017

The Crop Forecast Survey combines the Small & Medium Survey with the Large Scale Census

Data collection was done between the 21st of March and 10th April 2016

Small & Medium Scale Survey
Defn: less than 20 ha cultivated

Small & Medium scale household survey covers approximately **13,600** households at enumeration stage

Large Scale Survey
Defn >20 ha cultivated

Large Scale covers approximately 1,500 large scale farms

Large Scale Farms in the Frame range include

Cultivating 20 to 46,000 ha

Zambia National Service Farms

Prisons Farms

School and other institutional Farms

Small and Medium Category:

Small 0-5 ha

Medium 5-19.99 ha

Category of Field Staff	Number Employed
Small & Medium Scale data collection staff	510
Large Scale Farms Data collection Staff	50
Data Entry Staff	6
Data Analysis team	30

2015/2016 Crop Forecast Survey Results Presentation

Ministry of Agriculture and The Central Statistical Office

10th May 2017

Field Data Collection took place between 25th March and 25th April 2017 when most crop had reached R1 to R4

Cost of Production Analysis based on the 2016/2017 CFS

Cost components

- **Labour cost**
- **Fertilizer**
- **Seed**
- **Herbicides and**
- **Transport cost of
Fertilizer to homestead**
- **Imputed Land rental
Value**

Production Highlights

- Area planted to most crops has **increased**
- **Maize and Soya beans** have posted significant percentage increase in production
- **Yields** for most crops have increased
- Maize and soya production are highest ever recorded in Zambia's history

Major reasons for the change in production

- Improved **rainfall**
- Increased **area planted** to maize
- Increase in allocation of **inputs** especially to some high production areas e.g.....
